

Quest® ChangeAuditor for Exchange

Real-Time Auditing for Exchange

E-mail has become the predominant business tool for communication within and between organizations. As a result, e-mail serves as a repository of information—some of it sensitive and vulnerable to misuse. Many organizational policy violations go undetected because most security actions are not audited. This can result in lost productivity and system downtime—a risk no organization should take.

Today, companies need in-depth auditing and reporting for Exchange security and compliance to prove regulatory compliance and drive efficiencies.

ChangeAuditor for Exchange proactively audits the activities taking place in your Exchange environment and provides real-time, detailed alerts when vital changes occur. Continually being in-the-know helps you to prove compliance, drive security and improve uptime while proactively auditing changes to Exchange Server configurations and permissions. You'll have the ability to track, alert and report on Exchange security and policy settings, as well as quickly troubleshoot other Exchange problems by automatically collecting all information related to major changes, including the original and current values.

Audit All Critical Changes

ChangeAuditor for Exchange provides extensive, customizable auditing and reporting for all critical changes to Exchange, including administrative groups, mailbox policies, public and private information store auditing, organizational changes such as Active Sync mailbox policy changes, distribution list changes and more. You'll get complete visibility into all changes with in-depth forensics on "Who, What, When, Where and Why," plus the original and current values for all changes. And, with real-time alerts, you'll maintain constant awareness of vital policy changes as they occur, reducing the risks associated with day-to-day modifications.

With ChangeAuditor for Exchange, you'll get the Who, What, When and Where of change, plus you can add comments on Why a specific change was made and fulfill your audit requirements.

Key Benefits

- Installs easily to ensure rapid deployment in days versus weeks
- Enables enterprise-wide change management from a single client
- Ensures a secure and compliant networking environment by tracking all critical changes in real-time
- Automates procedures to continually track and report on compliance initiatives
- Drives availability by enabling proactive troubleshooting
- Enables streamlined Windows management through integration with SCOM and other platforms
- Streamlines compliance to corporate and government policies and regulations, including SOX, PCI DSS, HIPAA, FISMA, SAS 70 and more
- Turns information into intelligent, in-depth forensics for auditors and management

Key Features

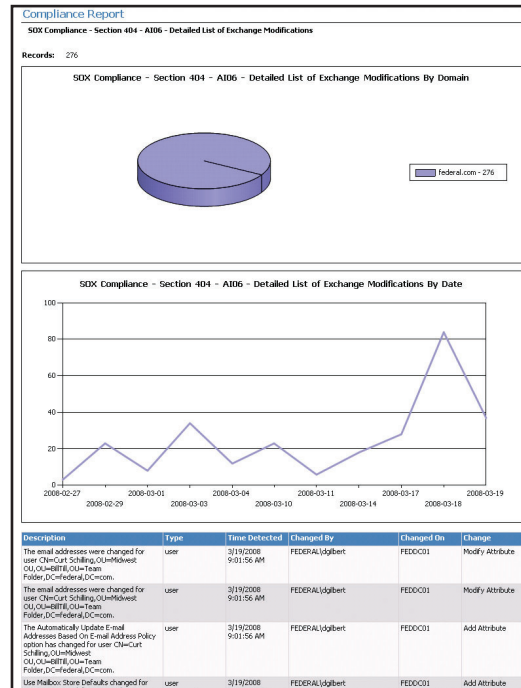

- More in-depth Exchange auditing with over 300 events around Exchange Server configurations and permissions, including support for Exchange 2007 events such as Active Sync Mailbox policies or Unified Messaging
- Integration with Management Pack for Microsoft Systems Center Operations Manager (SCOM) enables you to leverage the power of System Center for more detailed analysis of your Exchange environment
- Extensive real-time configuration, security auditing, alerting and reporting
- Detailed “Who, What, When, Where and Why,” plus original and current values for all changes
- Comprehensive audit library, including built-in alerts, reports and powerful searches based on Microsoft and security best practices and regulations
- Extensive reporting library for compliance, security and operations
- Instant change alerts, as well as “Smart Alerts” are dispatched based on event patterns
- Scheduled delivery and subscription-based reporting through integration with SQL Reporting Service

Track User Activity

ChangeAuditor for Exchange helps tighten enterprise-wide change and control policies by tracking user and administrator activity for user account and delivery restriction changes. With 24x7 real-time alerts, in-depth analysis and reporting capabilities, your Exchange infrastructure is protected from exposure to suspicious behavior or unauthorized access, and is always in compliance with corporate and government standards.

Turn Irrelevant Data into Meaningful Information to Drive Security and Compliance

ChangeAuditor for Exchange tracks critical configuration changes to your Exchange environment, then translates raw data into meaningful intelligent data to help safeguard the security and compliance of your infrastructure. This comprehensive solution offers real-time alerts, Smart Alert technology for intelligent event correlation and in-depth reports on the activities taking place in your infrastructure.

With a built-in Compliance Library and the ability to build your own reports, proving compliance for standards such as Sarbanes-Oxley (SOX) is a breeze.

Automate Reporting for Corporate and Government Regulations

Utilizing Microsoft’s SQL Reporting Services (SRS), ChangeAuditor for Exchange provides clean, meaningful security and compliance reports on the fly. With a built-in Compliance Library and the ability to build your own custom reports. Proving compliance for standards such as Sarbanes-Oxley (SOX), Payment Card Industry Data Security Standard (PCI DSS), Health Insurance Portability and Accountability Act (HIPAA), Federal Information Security Management Act (FISMA) and SAS 70 is a breeze.

About Quest Software, Inc.

Quest Software, Inc., a leading enterprise systems management vendor, delivers innovative products that help organizations get more performance and productivity from their applications, databases, Windows infrastructure and virtual environments. Through a deep expertise in IT operations and a continued focus on what works best, Quest helps more than 90,000 customers worldwide meet higher expectations for enterprise IT. Quest provides customers with client management as well as server and desktop virtualization solutions through its subsidiaries, ScriptLogic and Vizioncore. Quest Software can be found in offices around the globe and at www.quest.com.
